

****YouTube has some GREAT resources. Just search “pole tent instructions.”**

1. **Layout the tent.** Spread drop cloths and unroll canopy at exact position of desired finished location. Assemble all poles, the center pole will have 3 pieces the rubber stopper is always at the bottom of all poles. Lay each pole straight out from each pole hole in canopy. *The center pole will be used later, once the side poles have been stood up.

2. **Take 2 tent stakes to each corner.** Take 2 steps back from tent corner approximately 5-6 feet and place stakes in the ground outstretched arms length apart. Repeat for all corners. Then place left over stakes (middle ones) in line with hole in tent between the corner stakes. Drive stakes in. These stakes need to be in line with the appropriate corner stakes.

3. With a partner, work on **opposite corners of the tent.** You will both begin raising your corner of the tent (to lever each other). Insert side poles into pole holes and raise so that bottom of poles slant toward center of canopy. Tie guy rope around stakes and use the “S” hook to tighten the rope. Continue with other two corners and then sides.

4. **Now place the center pole.** Insert the 3 piece pole into the center hole in an upright position. Tie off the jump rope hanging down to the center pole.

5. All **side poles** will need to be adjusted. Tighten guy ropes and then set side poles to upright position. Adjust pole positions and guy rope tension to properly pull out canopy. It is recommended that stakes are noticeable in the ground so that it is not a safety issue.

6. **Take Down.** Remove center pole first. Next, place drop cloths to protect the tent. With a partner you will want to begin to loosen the ropes, each on an opposite corner (just like when you put it up). Once the rope is loose enough to begin to pull the pole out. Do this for all poles. Next remove ropes tied to stakes. Remove stakes. Take poles a part. Place everything in the designated bags. Count your pieces.

ALL PURPOSE CANOPY PARTS LIST

PARTS	CANOPY SIZE			
	10' x 10'	12' x 12' THROUGH 20' x 20'	20' x 30'	20' x 40'
SIDE POLE	4	8	10	12
CENTER POLE	1	1	2	3
5/8" x 24" STEEL STAKES	8*	12*	14*	16*
BAG WITH TOP	1	1	1	1
BAG FOR POLES	1	1	1	1
BAG FOR STAKES	1	1	1	1
* IMPORTANT NOTE: REFER TO CAUTION STATEMENT #2 FOR IMPORTANT WARNING ABOUT NUMBER OF STAKES SUPPLIED. (SEE BACK PAGE OF THIS MANUAL)				

MANPOWER REQUIRED

Two installers should be able to assemble an All Purpose Canopy in approximately thirty minutes.

TOOLS REQUIRED

Sledge Hammer

INSPECT SITE CAUTION:

Consult your local utility locator service or the National Utility Locating Contractors Association (NULCA) prior to installation. Prior to actual tent assembly, be sure to look up, down, above & below for obstacles, pipes, wires, trouble, etc.

LAYOUT & CHECK

Use parts list for a quick identification and check list for proper quantities.
